## Project Description:

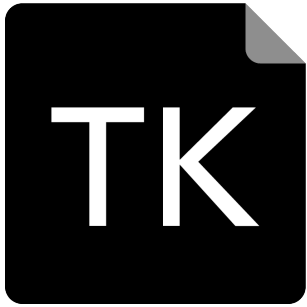

The purpose of this project is to co-design an interactive website and community data store to showcase the Cree knowledge collected as part of the Tawich study. This project is a partnership between Mushkegowuk Council and Carleton University Geomatics and Cartographic Research Centre. The interactive website is for the Cree communities to access, share, and interact with their own information, as well as for cultural preservation, a voice for communities, and protection of the lands and waters. It will be driven by the stories of people interviewed during the Tawich study with photographs, videos, Cree voice recordings, and animations with geo-referenced community information. The site will reflect Cree values and ways of knowing. The technologies and project are designed in alignment with data and information ownership, control, access, and possession protocols (OCAP) and as specified by the Mushkegowuk Council and communities. Indigenous contributions to the site materials, including art and other similar contributions, will be managed through copyright and Local Contexts attributions, at the discretion of participating artists and other project contributors.

## Project Notices

## **Attribution Incomplete Notice**

Collections and items in our institution have incomplete, inaccurate, and/or missing attribution. We are using this notice to clearly identify this material so that it can be updated, or corrected by communities of origin. Our institution is committed to collaboration and partnerships to address this problem of incorrect or missing attribution.

## **Traditional Knowledge Notice**

The TK (Traditional Knowledge) Notice is a visible notification that there are accompanying cultural rights and responsibilities that need further attention for any future sharing and use of this material. The TK Notice may indicate that TK Labels are in development and their implementation is being negotiated.
