Project Description:

Some peatlands in Canada are disturbed by peat extraction resulting in clearing of vegetation and drainage. Restoration methods have been developed to help return peatland function, with the moss layer transfer technique being the most widely applied. This sub-project contains a data set of plant community information and carbon dioxide and methane flux measurements that were made on a restored peatland near Wandering River, Alberta. Results have been reported in a paper in Ecological Engineering provided in the Project Links.

Project Notices

Attribution Incomplete Notice

Collections and items in our institution have incomplete, inaccurate, and/or missing attribution. We are using this notice to clearly identify this material so that it can be updated, or corrected by communities of origin. Our institution is committed to collaboration and partnerships to address this problem of incorrect or missing attribution.

Attribution Incomplète (French)

Certaines collections ou items dans nos institutions ont des attributions incomplètes, inexactes ou manquantes. Nous utilisons cette notification afin d'identifier clairement ce matériel pour qu'il soit mis à jour ou corrigé par les communautés d'origine. Notre institution s'est engagée à collaborer et à travailler en partenariat avec ces communautés afin de résoudre le problème d'attributions inexactes ou manquantes.

Biocultural Notice

The BC (Biocultural) Notice is a visible notification that there are accompanying cultural rights and responsibilities that need further attention for any future sharing and use of this material or data. The BC Notice recognizes the rights of Indigenous Peoples to permission the use of information, collections, data and digital sequence information (DSI) generated from the biodiversity or genetic resources associated with traditional lands, waters, and territories. The BC Notice may indicate that BC Labels are in development and their implementation is being negotiated.

Notification BC (Bioculturelle) (French)

La notification BC sert à rendre visible l'information selon laquelle le matériel utilisé est accompagné de droits culturels et de responsabilités qui nécessitent une attention particulière au moment de le partager ou de l'utiliser. La notification BC est une reconnaissance des droits des peuples autochtones de permettre l'utilisation d'informations, de collections, de données et d'informations sur les séquences numériques provenant de la biodiversité et des ressources associées à leurs terres, cours d'eau et territoires traditionnels. La notification BC peut indiquer que les étiquettes BC (bioculturelles) sont en cours de réalisation et que leur application est en train d'être négociée. Pour plus d'information à propos des étiquettes BC, consulter le site <https://localcontexts.org/notices/biocultural-notices/>.
